

**TOTO THEO**  
MARITIME

A maritime company  
focused on technology

[tototheo.com](http://tototheo.com)

# Who We Are

For decades now, we specialize in maritime technology solutions focusing on optimizing vessel and fleet performance.

Our services include innovative, efficient and functional solutions in the fields of satellite communication, navigation systems, digitalization and end-to-end cyber security services.

Our offices in Cyprus and Greece offer complete solutions starting from pre-sales consultancy all through onboard installation and maintenance and after sales support. Through our teams and partners located in Europe, USA, Middle East and Far East we provide a global reach with a local touch.

We invest heavily in research and development, in partnership with our customers, providing fit-for-purpose solutions, always considering the complex interactions between assets and resources within our industry.

Our strength lies in our people who apply their experience, know-how and willingness to listen, towards offering the right solutions. We are driven by our passion and expertise to provide the solutions our customers need for a sustainable future.

# Our Values

Tototheo Maritime operates in a connected dynamic and sustainable maritime sector, supported by reliable and efficient connectivity and innovative technologies. All underpinned by the Tototheo values.

We conduct our business with  
**Honesty & Transparency**

We offer equal terms of treatment and  
**Integrity without Prejudice**

Our team is characterised by a  
**Desire to listen & willingness to advise**

We move forward with an  
**Unapologetically optimistic view of the future**

While remembering the  
**Responsibilities of today**

# What We Stand for

We build trusted and long-lasting relations with our customers, providing the expertise to navigate the technological landscape as it evolves.

The interactions between the various stakeholders of the maritime sector are more frequent and more complex than ever. Vessels are becoming more and more connected to shore through advanced communications networks.

Digitalisation is no longer a buzzword for the future of maritime, it is the present and with it, comes the increased need to manage large volumes of data and information, interpret them and transform them into real business value.

We believe that people stand in the center of this transformation of our industry and we provide the tools and support required for you and your team to remain ahead of the changes.

# What We Do

We help you optimize your operations and capitalize on the interactions between your resources.

## Connectivity

Meeting the demands of today and preparing for tomorrow. Customized satellite communication services with complete administration (AAIC = CY05, PSA 3001).

## Digital Solutions

We have tapped into the possibilities offered by technology and we bring this into shipping applying our deep understanding of the maritime industry.

## IoT & Fuel Consumption Monitoring

Our IoT collectors enable you to receive condition signals from a number of critical areas including vital fuel monitoring. The data collected is sent to the cloud for visualization on our TM Synergia platform, where you can access critical near real time information.

## Navigation & Communication Equipment

We work directly with the OEMs to provide the best delivery time and prices on navigation, communication, and safety equipment. Working closely with our customers and principals to meet the demands of today's operations, adding flexibility and helping you update your bridge equipment in the most cost-effective way.

## Cyber Security Solutions

With increased connectivity and technological growth, new risks arise. Our cyber security solutions are designed to address and protect your operations from these new challenges.

## Comprehensive Regulatory Compliance

Through the multitude of rules and regulations applicable to our industry, we help you make compliance an integral part of your daily operations, securely and efficiently.

### IT as a Service (ITaaS)

With increased connectivity and technological growth, new risks arise. Our cyber security solutions are designed to address and protect your operations from

### Global Service Coordination Centre

Class and Periodical Surveys, LRIT testing, Shore Based Maintenance, Training: all delivered by certified and experienced engineers.

### Voyage Optimization

Capitalizing on the dynamic and complex interactions between internal and external resources, **TM Synergia** gives you real-time information with snap-shot reporting. Behind the scenes, the state-of-the-art platform allows machine learning and the deployment of advanced analytics to dig deeper into business operations.

### 3D Virtual Tours

Taking situational awareness to the next level. Get a high resolution truly interactive virtual tour of your ship on any computer tablet or phone. Discover clickable objects as you walk through your vessel. Immersive walkthroughs, making the familiarization and learning experience widely accessible and tailor made. Online/Offline and VR compatible.

### Consultancy

A wide range of consultancy services, including training, project management for large or small bridge equipment retrofit projects, onboard surveys and inspections for diagnostic and planning purposes, pre-sales and after-sales support and other bespoke services.
