STARLINK

Enabling Global Connectivity & Unleashing Possibilities

High speed, low latency and
optimized data handling connectivity

www.tototheo.com

RELIABLE, HIGH-SPEED CONNECTIVITY

Unlike traditional satellite internet providers, Starlink's low-earth orbit satellites provide fast, low-latency internet connectivity with speeds of up to 220 Mbps.

GLOBAL COVERAGE

Coverage is available across the vast majority of the Earth's oceans so you can stay connected no matter where you are.

**Revolutionize your
Connectivity with
Tototheo Maritime's
Starlink LEO
Integration**

EASY TO INSTALL

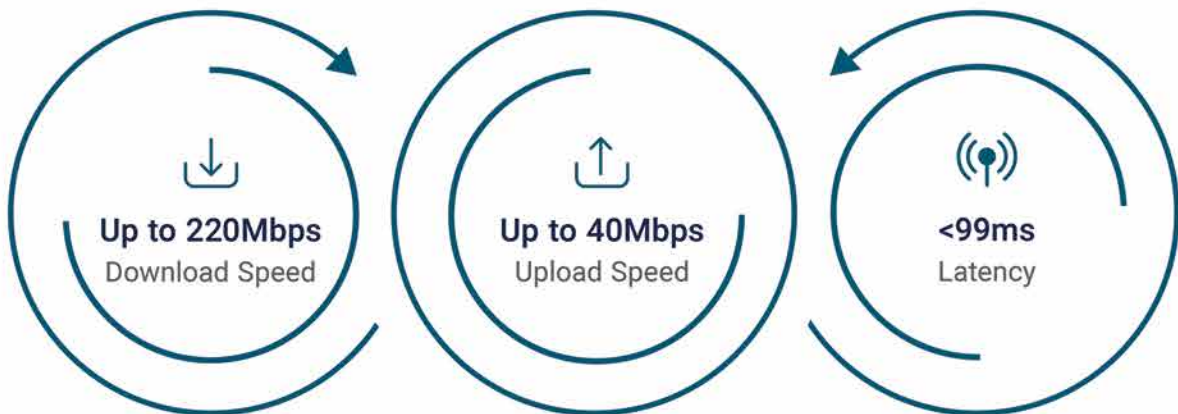

Starlink's antenna is a plug-and-play device.

COST-EFFECTIVE

A cost-effective alternative to traditional satellite internet providers, with no long-term contracts and competitive pricing.

Cutting-Edge Connectivity Solutions

We offer cutting-edge connectivity services that are easy to set up and maintain, utilizing SD-WAN and SD-LAN solutions. Our solutions provide you with superior performance, scalability, and reliability. Tototheo Maritime offers an integrated, hybrid connectivity solution that combines the high-speed and low latency of the Starlink LEO service with our comprehensive service network.

Stay connected on sea, air, or land with impressive download speeds of up to 350Mbps and low-latency service, revolutionizing the way you communicate.

SCALABLE SOLUTIONS

Our customizable packages cater to various vessel types and sizes, ensuring seamless integration with your existing infrastructure and adapting to your unique requirements.

ENHANCED SAFETY AND SECURITY

Stay safe and secure with our advanced cybersecurity features and continuous network monitoring, enabling you to operate with complete peace of mind.

COMPREHENSIVE SUPPORT

Tototheo provides comprehensive network support, offering businesses access to a complete network toolkit that includes advanced monitoring, management, and reporting tools.

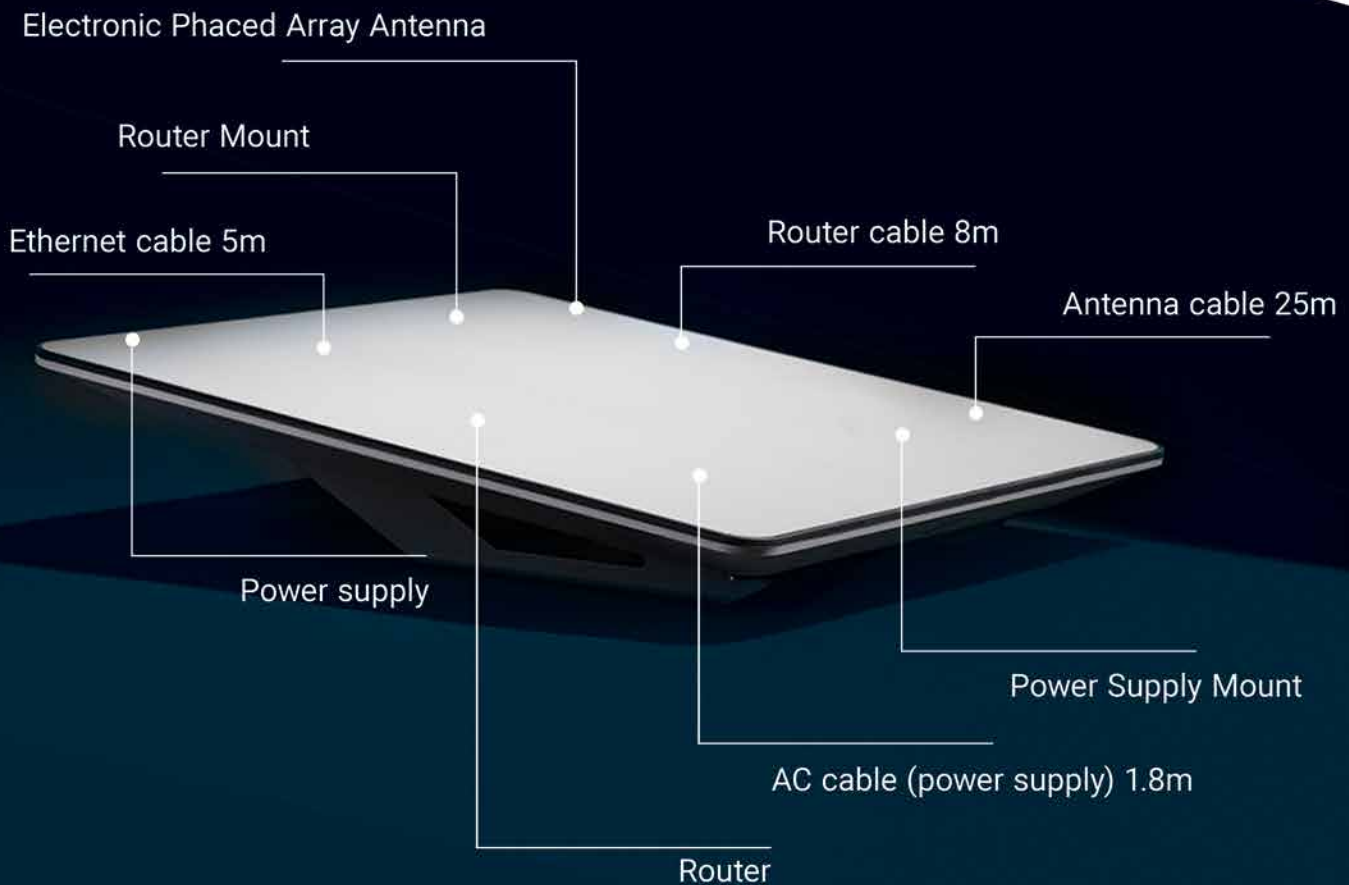

HARDWARE

STARLINK FLAT HIGH-PERFORMANCE KIT

State-of-the-art phased-array antenna, modem, mounting hardware

The equipment is easy to install, operate, and maintain, so you can focus on running your business. Designed for mobility applications and challenging environments.

HARDWARE

STARLINK STANDARD KIT (V3)

State-of-the-art phased-array antenna. Best for everyday use internet applications like streaming, video calls, online gaming & more.

The equipment is easy to install, operate, and maintain, so you can focus on running your business.
