

# TM AIS

## Simple, Effective Maritime Safety and Awareness

At Tototheo Global, we know that navigating the seas requires more than just skill—it requires the right tools to ensure safety and efficiency. TM AIS, is a service that uses the Automatic Identification System to provide real-time vessel tracking and enhanced situational awareness. With TM AIS, you can keep a constant eye on your vessel's location, as well as nearby ships, helping to make every journey safer and smoother.

### Why TM AIS

#### Enhanced Situational Awareness

TM AIS delivers live updates on the positions of vessels around you, giving you a complete picture of your surroundings. This broader awareness helps you make smarter navigational decisions and avoid potential hazards, ensuring safer voyages.

#### Real-Time Tracking

Stay fully informed of your vessel's movements, with location updates as frequently as every minute. This accurate, real-time data makes it easy to monitor your ship's position and track other vessels nearby, reducing the risk of collisions and improving coordination in busy areas.

#### Independent & Reliable

Designed to work independently from other onboard systems, TM AIS won't interfere with your existing equipment. Plus, it acts as a reliable backup if your primary AIS system goes offline, ensuring uninterrupted tracking and safety coverage when you need it most.

#### Remote Management for Easy Control

TM AIS can be managed remotely, giving you the freedom to monitor and adjust the system from anywhere. This remote capability makes it easier to stay on top of operations, whether you're onboard or offsite.

#### Seamless Integration with Other Systems

TM AIS data integrates smoothly with other maritime platforms, enriching your entire operational system with valuable AIS information. This data helps improve planning, decision-making, and overall operational efficiency.

# The Tototheo Global Advantage

Tototheo Global offers advanced connectivity and technology services across maritime, land, and air sectors. Backed by decades of technical expertise, we deliver innovative, tailored solutions—ranging from satellite communications and navigation to AI, IoT, and cybersecurity—for optimized performance and sustainable growth.

## Innovative and Sustainable

We prioritize continuous innovation and sustainability, providing future-ready solutions that reduce environmental impact.

## Global Reliability

With a strong global presence, we offer consistent, reliable service and quick support, wherever your fleet operates.

## Tailored Approach

We deliver customized solutions that meet the specific needs of each client, ensuring the best fit for your operations and sustainability goals.

## Seamless Integration

Built for easy integration, each service comes with full support for smooth implementation across your operations.

## Enhanced Well-Being

Our solutions are designed to improve both operational efficiency and crew well-being, ensuring safer, more enjoyable voyages.
